Re: Microlon Treatment

I write with regards to my recent installation of Microlon engine treatment to my 1998 Audi 1.8 petrol. I was totally amazed that within a few hours driving that the car felt totally different. It had more torque out of the roundabouts and a much smoother acceleration through the gears.

The one thing that really shocked me was the fact that I was previously doing approx 30mpg around Milton Keynes and about 35mpg on a journey. Since the installation of Microlon I am now regularly getting 40-45mpg around town and amazingly up to just under 50mpg on a recent trip to Brighton. AMAZING!!

I recently took the car for an MOT and on the emissions results were much better than previous MOT results. On the natural idle test it shows CO% now at 0.014 and last year it was at 0.300. The HC are at 102 and last year they were at 200

I would certainly recommend Microlon and only wish I had seen this years ago.

Thank you for all your assistance during treatment and the great after sales care that you have shown.

Yours sincerely

Lee Gallagher
